CONTENTS

Volume 37, 1970

AARTS, J. M., DE GROOT, J. AND MCDOWELL, R. H. Cotopology for metrizable spaces 291

AHERN, P. R. A condition for peak points 67

AHMAD, SHAIR. Split dilations of finite cyclic groups with application to finite fields 547

ALLAUD, G. Concerning universal fibrations and a theorem of E. Fadell ... 213

AL-SALAM, W. A. AND VERMA, A. Generalized Sheffer polynomials 361

AMIR-MOÉZ, A. R. AND JOHNSTON, G. E. Extreme properties of products of quadratic forms 61

ARKIN, JOSEPH. Researches on partitions 403

ARMSTRONG, W. W. Convergence radius of regularly monotonic functions 41

BALBES, RAYMOND AND HORN, ALFRED. Stone lattices 537

BANCHOFF, THOMAS F. Total central curvature of curves 281

BREWER, J. W. Ohm's property (n) for field extensions 353

BROOKS, R. M. On singly-generated locally M-convex algebras 529

BURDE, GERHARD AND MURASUGI, KUNIO. Links and Seifert fiber spaces 89

CALABI, EUGENIO AND HARTMAN, PHILIP. On the smoothness of isometries 741

CARLITZ, L. Sequences and inversions 193

CLARK, C. E. Certain types of congruences on compact commutative semigroups 95

COLTON, DAVID AND GILBERT, ROBERT P. Nonlinear, analytic partial differential equations with generalized Goursat data 367

CULLEN, MICHAEL R. H^p spaces and conformal mapping 609

DAVERMAN, R. J. Non-homeomorphic approximations of manifolds with surfaces of bounded genus 619

DE GROOT, J., MCDOWELL, R. H. AND AARTS, J. M. Cotopology for metrizable spaces 291

DEMAR, RICHARD F. Uniqueness classes for periodic-type functionals 29

DEMARR, RALPH. A generalization of the Perron-Frobenius theorem 113

DE SNOO, H. S. V. An extension of Neumann's integralrelation for generalized Legendre functions 71

DIJKSMA, A. AND MEIJER, H. G. On uniform distribution of sequences in $GF[q, x]$ and $GF\{q, z\}$ 507

DOUGLAS, R. G. AND PEARCY, CARL. A note on quasitriangular operators 177

FERGUSON, EDWARD N. No semigroup on the two-cell with idempotent boundary 601

FERGUSON, LE BARON O. Algebraic kernels of planar sets 225

FORD, JAMES W. M. AND SHIRALI, SATISH. Symmetry in complex involutory Banach algebras II 275

FREDMAN, MICHAEL L. Arithmetical convolution products and generalizations 231

GARNETT, JOHN. Metric conditions for rational approximation 689

GILBERT, ROBERT P. AND COLTON, DAVID. Nonlinear, analytic partial differential equations with generalized Goursat data 367

GILLETT, J. R. On the largest prime divisors of ideals in fields of degree n .. 589

GILMER, ROBERT. Contracted ideals in Krull domains 769

GILMER, ROBERT AND MOTT, JOE. Some results on contracted ideals 751

GOLDBERG, M. AND MOON, J. W. On the composition of two tournaments 322

GOLDBERG, S. I. AND YANO, K. Manifolds admitting a non-homothetic conformal transformation 655

GREEN, JOHN W. Concerning the separation of certain plane-like spaces by compact dendrons 555

GREENFIELD, STEPHEN J. Most tori are extendible to an open set 485

HARTMAN, PHILIP AND CALABI, EUGENIO. On the smoothness of isometries 741

HEINZER, WILLIAM. A note on rings with Noetherian spectrum 573

HELLERSTEIN, SIMON, SHEA, DANIEL F. AND WILLIAMSON, JACK. A Tauberian theorem characterizing the regularity of growth of a class of entire functions 489

HILDEN, HUGH M. A characterization of the extreme points of some convex sets of analytic functions 715

HILL, PAUL. The purification of subgroups of Abelian groups 523

HORN, ALFRED AND BALBES, RAYMOND. Stone lattices 537

HOYLE, HUGHES B. III. Connectivity maps and almost continuous functions 671

HUCKABA, JAMES A. Some results on pseudo valuations 1

ISAACS, I. M. Groups with many equal classes 501

JONES, B. FRANK, JR. AND TU, C. C. Non-tangential limits for a solution of the heat equation in a two-dimensional Lip_α region 243

JONES, STEPHEN L. Continuous collections of compact manifolds 579

JOHNSTON, G. E. AND AMIR-MOÉZ, A. R. Extreme properties of products of quadratic forms 65

JORDAN, JAMES H. The distribution of k-th power non-residues 333

KATŌ, SADAO. Mitchell domains in several complex variables 139

KILTINEN, JOHN O. Embedding a topological domain in a countably generated algebraic ring extension 647

KIRCH, A. M. Generalized restricted direct products 171

LAWSON, JIMMIE D. The relation of breadth and co-dimension in topological semilattices 207

LEE, D. H. AND WU, T. S. On CA topological groups 515

LICK, DON R. n-Hamiltonian connected graphs 387

LIPSMAN, RONALD L. An indicator diagram, II. The convolution theorem for connected unimodular groups 459

LUTHER, NORMAN Y. Completion regularity of (weakly) Borel measures .. 11

MCDONALD, B. R. Enumeration of classes of row equivalent matrices over a principal ideal domain modulo p^n 163

MCDONALD, B. R. Enumeration of canonical matrices under row-equivalence over a principal ideal domain modulo p^n 393

MCDOWELL, R. H., AARTS, J. M. AND DE GROOT, J. Cotopology for metrizable spaces 291

MCMILLAN, J. R. On the boundary correspondence under conformal mapping 725

MCWILLIAMS, R. D. On certain Banach spaces which are w^*-sequentially dense in their second duals 121

MANDELKER, MARK. Relative annihilators in lattices 377

MEIJER, H. G. AND DIJKSMA, A. On uniform distribution of sequences in $GF[q, x]$ and $GF\{q, x\}$ 507

MEYERS, WILLIAM E. Local peak sets of uniform algebras 701

MOON, J. W. AND GOLDBERG, M. On the composition of two tournaments .. 322

MOSCHOVAKIS, YIANNIS N. The Suslin-Kleene theorem for countable structures 341

MOTT, JOE AND GILMER, ROBERT. Some results on contracted ideals 751

MURASUGI, KUNIO AND BURDE, GERHARD. Links and Seifert fiber spaces 89

NUSSBAUM, ROGER D. The radius of the essential spectrum 473

OLIN, PHILIP. Elementary extensions within reduced powers 421

OSTROM, T. G. Desarguesian decompositions for planes of order p^2 151

OWINGS, JAMES C., JR. An elementary approach to Diophantine equations of the second degree 261

PEARCY, CARL AND DOUGLAS, R. G. A note on quasitriangular operators 177

PHILIPP, WALTER. Some metrical theorems in number theory II 447

POLLINGHER, ADOLF AND ZAKS, ABRAHAM. On Baer and quasi-Baer rings 127

PORTER, A. DUANE. Generalized bilinear forms in a finite field 55

ROBERTS, JOHN H. Metric-dependent function d_2 and covering dimension 467

ROBERTS, J. H. AND SLAUGHTER, F. G., JR. Characterization of dimension in terms of the existence of a continuum 681

ROBERTSON, M. S. The sum of univalent functions 411

ROGERS, J. W., JR. Continua that contain only degenerate continuous images of plane continua 479

ROSENTHAL, PETER. Examples of invariant subspace lattices 103

RUBIN, LEONARD R. The product of any dogbone space with a line is E^4 189

RUDIN, WALTER. An extension theorem for positive-definite functions .. 49

SAWOROTNOW, PARFENY P. Representations of a topological group on a Hilbert module 145

SCHOENFELD, LOWELL. Concerning Whitney's representations of differentiable even and odd functions 311

SHAPIRO, JOEL H. Extension of linear functionals on F-spaces with bases 639

SHEA, DANIEL F., WILLIAMSON, JACK AND HELLERSTEIN, SIMON. A Tauberian theorem characterizing the regularity of growth of a class of entire functions 489

SHER, R. B. A result on unions of flat cells 85

SHILKRET, NIEL. Non-Archimedean Banach algebras 315

SHIRALI, SATISH AND FORD, JAMES W. M. Symmetry in complex involutory Banach algebras II 275

SIGMON, KERMIT. Cancellative medial means are arithmetical 439

SIU, YUM-TONG. Holomorphic functions of polynomial growth of bounded domains 77

SLAUGHTER, F. G., JR. AND ROBERTS, J. H. Characterization of dimension in terms of the existence of a continuum 681

SONI, KUSUM. A Sonine transform 431

SPEARS, NINA. A simplified proof of Chebyshev's theorem 709

SPIRA, ROBERT. Residue class characters 633

STADTLANDER, DAVID. Actions with topologically restricted state spaces 199

STONG, R. E. Equivariant bordism and $(Z_2)^k$ actions 779

SUFFRIDGE, T. J. Some remarks on convex maps of the unit disk 775

TEWS, MELVIN C. On maps which preserve almost periodic functions 21

TU, C. C. AND JONES, B. FRANK, JR. Non-tangential limits for a solution of the heat equation in a two-dimensional Lip_α region 243

VERMA, A. AND AL-SALAM, W. A. Generalized Sheffer polynomials 361

VERMES, ROBERT. Hankel determinants formed from successive derivatives 255

WENNER, B. R. Extending maps and dimension theory 627

WHYBURN, CLIFTON A. An elementary note on character sums 307

WILLIAMS, D. L. Isometries of translation-invariant subspaces of $C(R^n)$ 297

WILLIAMSON, JACK, HELLERSTEIN, SIMON AND SHEA, DANIEL F. A Tauberian theorem characterizing the regularity of growth of a class of entire functions 489

WU, T. S. AND LEE, D. H. On CA topological groups 515

YANO, K. AND GOLDBERG, S. I. Manifolds admitting a non-homothetic conformal transformation 655

ZAKS, ABRAHAM AND POLLINGHER, ADOLF. On Baer and quasi-Baer rings 127

ERRATA 787
